### Outside the school c1900 and 2017

What has stayed the same? The shape of the windows / the main building / the wall and gate / the fact that it is still a school.

What is different? The turret seems to have fallen down / it's bigger – extensions added / there are cars.

## The Playground c1900 and 2017

What has stayed the same? School is still in the same place.

What is different? Use of horses / people's clothes / Farm turned into playground

## Inside the classroom c1900 and 2017

What has stayed the same? Believe it or not – this is the same classroom! It is now divided into three rooms, but the windows and chimney are in the same place.

What is different? The lessons: 1900 – girls are sewing & boys are writing. 2017 – there are computers and smart boards. The desks, the work on the walls, the number of children, the uniforms, the types of lessons, the lighting (gas lights to electric lights) and heating (fireplace to radiators).

## Class photograph c1900

How does this compare to your school photographs?
